

Supplementary Fig. 3. (A, B) The relative quantitative expression of proteins in Figure 4G and 4J by using Image-J software. NC-SMAD3: negative control of SMAD3, si-SMAD3: short interference RNA of SMAD3. \**P* versus NC-SMAD3 and NC-miR, #*P* versus IN-miR and NC-SMAD3. \**P* < 0.05, \*\**P* < 0.01. #*P* < 0.05, ##*P* < 0.01. Each bar represents the mean ± SEM for at least three independent experiments. NC-miR, negative control of miR-203a-3p inhibitor; IN-miR, miR-203a-3p inhibitor; *ns*, no significance.
