

Supplementary Table 11. Meta-regression analyses of intervention durations for histological outcomes.

Outcomes	Coefficient	95% confidence interval	<i>P</i> value
Fibrosis improvement at least one stage without steatohepatitis worsening	0.0007	-0.0429, 0.0443	0.974
Steatohepatitis resolution without fibrosis worsening	0.0021	-0.0283, 0.0326	0.891
