

中医药作为我国的传统医学，为中华民族的繁荣昌盛做出了巨大的贡献。但是，西方把重分析、重实证的思维方式看作是唯一的科学思维方式。由于中医药的系统整体思维、阴阳平衡理论无法得到实证，一度被认为是伪科学。随着科学的发展，西方对中医药文化的接受度较之以前要高，在SCI领域出现了专门接受中医药相关研究的杂志，称之为补充替代医学(Integrative & Complementary Medicine)。这类杂志一共有27份。现在，我们将对这一类杂志分系列进行介绍。

本次我们将要介绍的是JCR一区杂志，一共有6份。

一、PHYTOMEDICINE

ISSN: 0944-7113 IF: 4.180 收稿量291

Website: <https://www.journals.elsevier.com/phytomedicine/>

Published in affiliation with the European Scientific Cooperative On Phytotherapy (ESCOPT) Elsevier, 欧洲植物药疗法科学合作组织

Scope

Phytomedicine is primarily a therapy-oriented Journal, which publishes innovative studies on efficacy, safety, quality and mechanisms of action of specified plant extracts, phytopharmaceuticals and their purified constituents. This includes clinical and preclinical studies of properly standardized herbal medicinal products, herbal preparations and isolated

compounds, which have reproducible pharmacological activity.

Received 26 June 2019, Revised 27 September 2019, Accepted 9 November 2019, Available online 10 November 2019.

Received 10 December 2018, Revised 14 October 2019, Accepted 15 October 2019, Available online 16 October 2019.

二、Journal of Ginseng Research

ISSN: 1226-8453 IF: 4.029 收稿量72

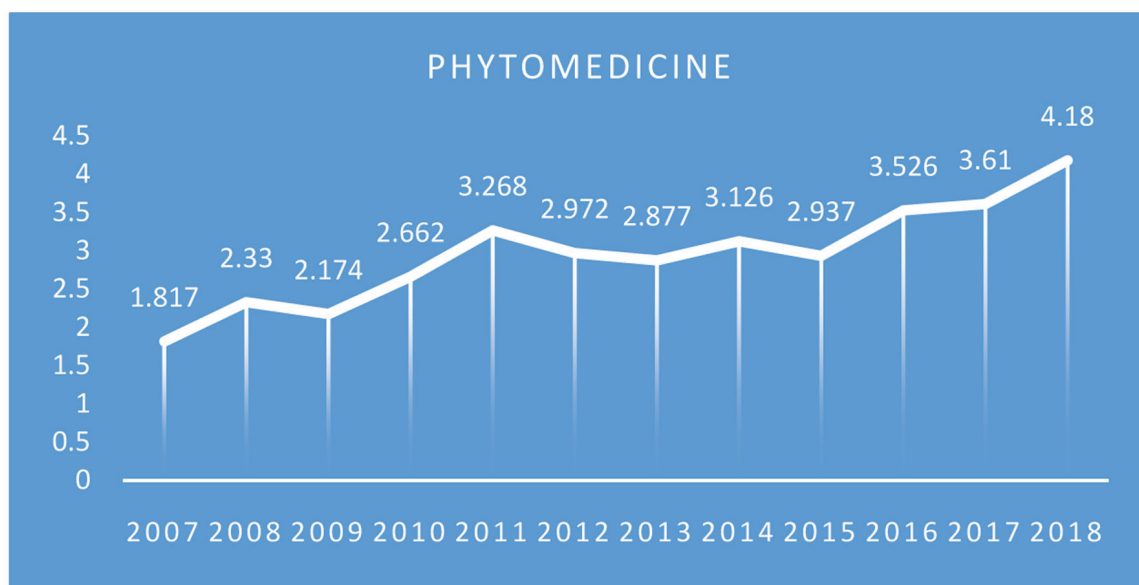

Website: <https://www.journals.elsevier.com/journal-of-ginseng-research/>

Journal of Ginseng Research (JGR) is an official, open access journal of the Korean Society of Ginseng

Elsevier 韩国人参协会 OA 杂志

Scope

The Journal of Ginseng Research (JGR) is a quarterly, peer-reviewed publication featuring high-quality studies related to basic and clinical aspects of ginseng to reflect recent progresses in ginseng research. Manuscripts are classified mainly into review articles, original research articles, and brief reports.

The Journal of Ginseng Research has published original works, either experimental or theoretical, that advance our understanding of ginseng science, including cultivation, biology, chemistry, pharmacology, veterinary science, biochemistry, manufacture, and clinical study of ginseng since 1976. It also includes new paradigm of integrative research, covering alternative medicinal approaches.

JGR is the only international journal for schol-

arly reports of ginseng science in the world. Main subjects of the journal are focused on basic and pre-clinical research on ginseng.

JGR helps understand biology and chemistry of ginseng and mechanisms of traditional efficacy of ginseng, and to put their clinical evidences together. It provides researchers, manufacturers, practitioners, teachers, scholars, and medical doctors balanced information on basic science and clinical ap-

美国 World Scientific Scope

The American Journal of Chinese Medicine, which is defined in its broadest sense possible, publishes original articles and essays relating to traditional or ethno-medicine of all cultures. Areas of particular interest include: Basic scientific and clinical research in indigenous medical techniques, therapeutic procedures, medicinal plants, and traditional medical theories and concepts;

Multidisciplinary study of medical practice and health care, especially from historical, cultural, public health, and socioeconomic perspectives;

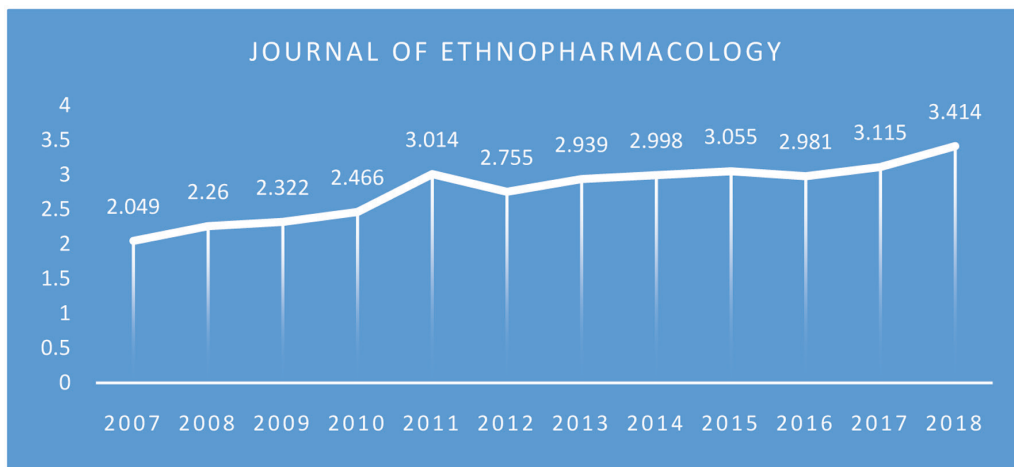

The Journal does not condone or support any form of research that makes use of endangered species or otherwise conducts experiments using animals

in an inappropriate or unethical manner. The Journal will consider for publications only those papers which follow the guidelines presented in the WHO Helsinki Declaration and the "Guiding Principles and Procedures of the Massachusetts General Hospital on Human Studies, 1970." For more detailed specifications for material submitted for publication, see "Note to Authors" in the inside back cover.

四、JOURNAL OF ETHNOPHARMACOLOGY

ISSN: 0378-8741 IF: 3.414 收稿量514

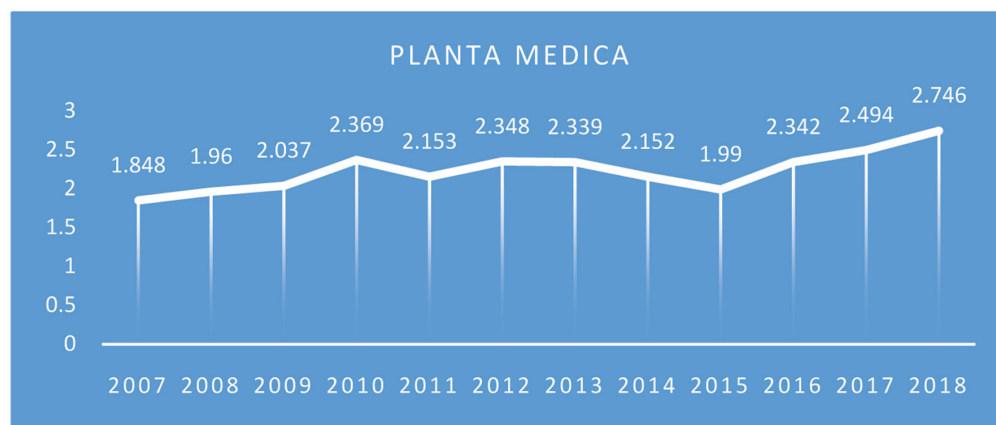

Website: <https://www.journals.elsevier.com/journal-of-ethnopharmacology/>

The Official Journal of the International Society for Ethnopharmacology

爱尔兰国际传统药物学会

Scope

The Journal of Ethnopharmacology is dedicated to the exchange of information and understandings about people's use of plants, fungi, animals, microorganisms and minerals and their biological and pharmacological effects based on the principles established through international conventions. Early people, confronted with illness and disease, discovered a wealth of useful therapeutic agents in the plant and animal kingdoms. The empirical knowledge of these medicinal substances and their toxic potential was passed on by oral tradition and sometimes recorded in herbals and other texts on *materia medica*. Many valuable drugs of

六、Acupuncture in Medicine

ISSN: 0964-5284 IF: 2.637 收稿量49

Website: <https://journals.sagepub.com/home/aim>

英国 SAGE

Scope

Acupuncture in Medicine is an international,

peer-reviewed journal that aims to promote the scientific understanding of acupuncture and related treatments by publishing scientific investigations of their effectiveness and modes of action as well as articles on their use in health services and clinical practice.

Acupuncture in Medicine is aimed at Western-trained physicians and other health professionals. The Western understanding of neurophysiology and anatomy is used to interpret the effects of acupuncture. The Journal uses the term ‘Western medical acupuncture’ and largely restricts its published articles to this Western approach. Evidence-based articles on traditional acupuncture (both clinical and theoretical) will, however, be considered. The editorial board welcomes scientific reports, systematic and general reviews, audits, case reports, descriptive and educational papers and other articles that may be of interest to readers.

文稿发表历程举例：未给出具体流程时间。
