

## 中医药方向期刊盘点（四）

吴敏

武汉美捷登生物科技有限公司

中医药作为我国的传统医学，为中华民族的繁荣昌盛做出了巨大的贡献。但是，西方把重分析、重实证的思维方式看作是唯一的科学思维方式。由于中医药的系统整体思维、阴阳平衡理论无法得到实证，一度被认为是伪科学。随着科学的发展，西方对中医药文化的接受度较之以前要高，在SCI领域出现了专门接受中医药相关研究的杂志，称之为补充替代医学（Integrative & Complementary Medicine）。本文将对这一类杂志分系列进行介绍。

我们已经介绍了JCR一区，二区和三区的杂志，此次将介绍JCR四区杂志，一共有7份。

## 二十二、European Journal of Integrative Medicine

ISSN: 1876-3820 IF(2019): 0.974 收稿量123

Website: <https://www.journals.elsevier.com/european-journal-of-integrative-medicine/>

德国 Elsevier

Scope

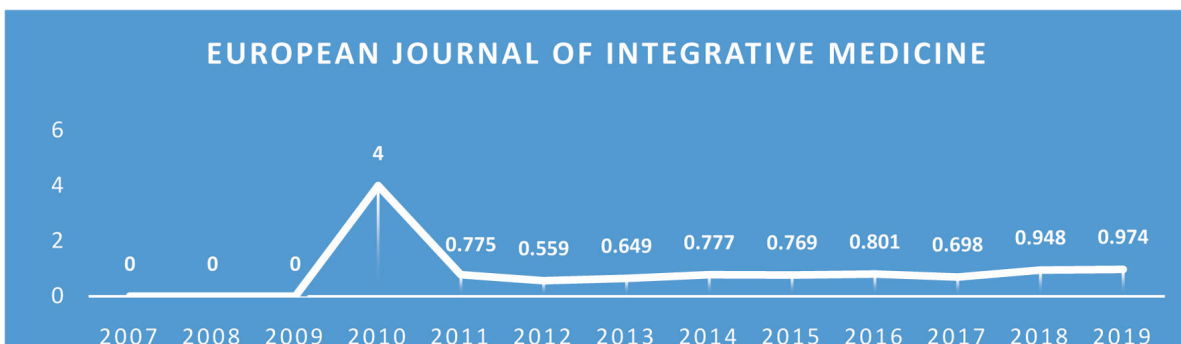

The *European Journal of Integrative Medicine (EuJIM)* considers manuscripts from a wide range of complementary and integrative health care dis-

ciplines, with a particular focus on whole systems approaches, public health, self-management and traditional medical systems. The journal strives to connect conventional medicine and evidence based complementary medicine. We encourage submissions reporting research with relevance for integrative clinical practice and interprofessional education.

*EuJIM* aims to be of interest to both conventional and integrative audiences, including healthcare practitioners, researchers, health care organisations,

educationalists, and all those who seek objective and critical information on integrative medicine. To achieve this aim *EuJIM* provides an innovative

international and interdisciplinary platform linking researchers and clinicians.

Website: <http://www.journaltcm.com>

中国

Scope

*Journal of Traditional Chinese Medicine* was first published in 1955 as China's earliest, most authoritative, and largest circulation TCM magazine in China. The English-language edition premiered in

1981, and the journal now publishes in French, Spanish, Dutch, German, and Portuguese. It is devoted to clinical and theoretical research on the use of acupuncture and Oriental medicine. The main columns include Clinical Observations, Basic Investigations, Reviews, Questions and Answers, an Expert's Forum, and Discussions of Clinical Cases. Its key topics include acupuncture and electro-acupuncture, herbal medicine, homeopathy, massage therapy, mind-body therapies, palliative care, and other CAM therapies.

Scope

The primary focus of *Holistic Nursing Practice (HNP)* is to explore holistic models of nursing practice and to emphasize the complementarity of traditional and holistic nursing and health care practices. *Holistic Nursing Practice* seeks articles on holistic nursing models and theory-based interventions and their outcomes. The term holistic is not restricted to complementary, alternative, and integrative health interventions but is rather an umbrella term that may occasionally encompass best practices of the medical model particularly when combined with a specific

holistic nursing intervention.

Articles sought for publication in *HNP* include the following themes: innovations in holistic nursing practice, exploration of controversies inherent in holistic nursing practice and health care; empirical and historical research related to holistic nursing practice, health care and policy, and values and ethical-legal issues related to holistic nursing practices. The holistic approach is a worldview that emphasizes the potential for health and healing in human systems rather than on disease process and deficit. Projected topics for future publication are listed on the front of each issue. These topics should not limit submission of articles on other topics by prospective authors. As the scope of the journal may change from time to time, the Editor reserves the right to reject articles not deemed a good fit before sending out for full peer review.

Website: <https://www.karger.com/Journal/Home/224242>

德国 Karger

Scope

Complementary Medicine Research is an inter-

national journal that aims to bridge the gap between conventional medicine and complementary alternative medicine (CAM) on a sound scientific basis, promoting their mutual integration. Accordingly, experts of both conventional medicine and CAM medicine cooperate on the journal 's editorial board, which accepts papers only after a rigorous peer-review process in order to maintain a high standard of scientific quality.
